

Data analytics and AI services in Canada

CGI

Human insights for trusted AI outcomes

Artificial intelligence and machine learning (AI/ML) are driving innovation, enabling new services and products, accelerating automation, boosting efficiencies, and transforming business models, all to the benefit of both the organization and the human. We are proud to help digital leaders strengthen their data strategy, creating real value with AI for industries, businesses, and governments in the country.

Achieve your organizational objectives with responsible AI

CGI's industry and AI experts collaborate to deliver AI-infused solutions that address your organizational challenges while staying compliant with regulations and standards. We understand that data governance is crucial to your AI success, as is keeping the human in the loop.

 Efficiency	 Revenue	 Risk management	 Resilience	 Sustainability
Automate processes and decision-making to increase efficiencies and optimally reduce costs.	Gain insights on each customer's unique behavior, preferences, and needs to improve offers and delivery.	Improve safety, lower risks and help to ensure regulatory compliance.	Maximize uptime and life expectancy of critical systems and infrastructure.	Advance sustainability objectives, carbon reduction and tracking through insights and tools.
E.g.: • Virtual customer and employee assistance • Asset performance • Workforce optimization • Switching modeling	E.g.: • Personalized services (increasing customer lifetime value) • Energy optimization, forecasting and pricing	E.g.: • Cyber and OT protection • Fraud prevention • Adherence to standards	E.g.: • Digital twins • Predictive asset maintenance • Supply chain demand planning • Quantum logistics	E.g.: • Automated digital audits • Corporate reporting • Carbon capture, certification and tracking

Innovate faster and beat your competitors

At CGI, our AI researchers and experts have been working for more than a decade with clients on exploring and singling out the best AI use cases, defining frameworks and solutions, and implementing AI technology in collaboration with our partners. Get ahead faster and take advantage of CGI's AI expertise.

Traditional AI

Perform and automate specific tasks using predetermined algorithms and rules.

E.g.: customer service chatbots, fraud prevention, equipment monitoring

Generative AI

Allow the creation of new content, such as text, images, or videos, in response to input prompts.

E.g.: legacy applications recoding, data hunting acceleration, consumer product redesign

Agentic AI

Enable sophisticated reasoning and iterative planning to autonomously solve complex, multi-step problems.

E.g.: personalized customer support, medical appointment scheduling, delivery route optimization

Robotics and automation

Program devices and systems to perform tasks without or with limited human intervention.

E.g.: assembly line robot automation, surgical robot assistance, warehouse management

Business intelligence

Collect, integrate, analyze, and present business data to support decision-making and strategic planning.

E.g.: financial forecasting, marketing campaign performance tracking

Data analytics

Analyze and interpret raw data to find patterns, trends, and correlations.

E.g.: predictive analytics, risk assessment, buying behavior

Combine advisory and engineering expertise

From PhDs to certified analysts, we have more than 5,500 consultants working on data analytics and AI projects globally. With CGI, rest assured your project is in competent hands, catered to you from our teams in Canada, and supported from other global Centers of Excellence when needed.

Business SMEs

Data scientists

Data engineers

AIOps/MLOps engineers

AI solution architects

Data architects and modelers

UI/UX/Viz designers

DevOps engineers

Cloud infrastructure engineers

Cyber security engineers

QA analysts

Project managers

Scrum masters

We strategically work with partners to your advantage

We leverage proven AI use cases and pre-built solutions, powered by trusted domain data sets, to help you maximize investments. This includes our own intelligent solutions as well as those from our third-party alliances. We also partner with innovation hubs in Canada to help you request funding whenever budget is a challenge.
